

**Amendments To The Specification**

1. Please substitute the following amended paragraph for the original paragraph that begins on page 2, line 3.

PCL version 6.0, for example, allows for a named sequence to be defined using the "Macro" commands. A Macro is a group of PCL commands that is given a name in the form of an identification number. Once stored in the printer memory, a macro can be executed repeatedly by additional command that calls the identification identification number of the macro. Versions of the POSTSCRIPT language include similar capability.

2. Please substitute the following amended paragraph for the original paragraph that begins on page 3, line 19.

Other aspects and advantages of the present invention ~~of the present invention~~ will become apparent from the following detailed description, taken in conjunction with the accompanying drawings, illustrating by way of example the principles of the invention.
